

Industrial Transformation Conference & Expo

The 2022 InSource Brew Tour
October 18 – November 8, 2022

Learn. Connect. Innovate.

Digitalization in manufacturing creates new opportunities for optimizing your operations, achieving efficiency, empowering people, transferring knowledge between generations, optimizing processes, innovating business models, and enabling flexible production to satisfy take part in customer-specific requirements.

Over the course of six weeks, beginning October 18th, InSource will embark on a seven-city road show across the Southeastern U.S. The one-of-its-kind conference will take place in local breweries, and you are invited to join us to learn how you can unleash the power of digital transformation in your industry.

This event is intended to help shape and reinvent manufacturing. The day will be filled with examples based on real-world scenarios that you can apply to your own operations. The agenda is complemented by roundtable discussions, hands-on learning, and the latest technology from InSource's partner vendors. Our hands-on workshop will address the digital transformation of work including how to digitally model, execute and analyze work processes and reduce human error.

We invite you to join engineers, innovation enthusiasts, and our experts at the 2022 InSource Brew Tour. Join us in one of seven cities for a day full of knowledge sharing, networking, innovating, and, of course, fun. The Brew Tour is free to attend, but registration is required to take part in the one-of-a-kind experience.

| | | |
